Re: Application for Minor General Plan Amendment for Aggregates

Planning and Zoning staff is requesting a Minor General Plan Amendment to include information on how to locate existing aggregate mines from the Arizona Geological Survey. This amendment is being requested due to the recent passage of HB 2453 at the state legislature. Approval of this minor General Plan Amendment will make our General Plan compliant with state law.

The proposed change to the General Plan is to add language to Land Use Policy LU-4.4 as follows:

“LU-4.4: Promote compatible land use adjacent to industrial sites including known sources of aggregate. Existing mines can be located using the Arizona Geological Survey’s website at <http://minedata.azgs.arizona.edu>.”
