

# Attention! Your Street Will Be Closing

## Tues, Oct 15<sup>th</sup>-Thurs, Oct 17<sup>th</sup>

During the road closure, the road will not be available for travel or parking whatsoever. If you need to use your vehicle during the 24 –hour period of road closure, **please plan ahead** by parking your vehicle outside of the area designated as closed.

**\*\*See other side for map of your street’s specific closure day\*\***

### WHY IS MY ROAD CLOSING?

Roads in your subdivision are having a pavement preservation treatment installed that will help significantly extend the life of asphalt streets. The benefits of properly maintained streets include higher property values, a smoother/safer ride, and reduced costs to the community by prolonging the need for replacement.

### WHAT IF MY CAR IS PARKED ON A ROAD THAT IS CLOSED?

Work will commence at 7:00 AM and the streets being treated will be closed for approximately 24 hours. A tow truck will be called for any cars parked on the streets scheduled to be treated that day. Towing expenses will be the owner’s responsibility per Section 10.15.080 of the Town Code.

### WHAT IF I DRIVE ON THE ROAD WHILE CLOSED?

You will be liable for damage to your vehicle and to repair the area of road you have driven on. Minimum repair cost is \$600, maximum \$3,000, to repair the installed surface treatment. In the event of an emergency, emergency vehicles will not be stopped from driving on the treated surface.

### SPRINKLERS MUST BE TURNED OFF

Water may damage the installation of the surface treatment. Please do not have sprinklers set to come on 24 hours before the road closure, during the road closure, or 24 hours after the road closure. Damage due to sprinklers will result in the same repair cost of \$600 minimum, \$3,000 maximum, to repair the installed surface treatment.

### SHUTTLE SERVICE

A shuttle service is provided for your convenience from 7:00 AM to 5:00 PM for the homes on the streets being treated that day. The shuttle will take you to/from your car parked outside the closed street. The shuttle service driver’s ability to recognize the curing stage of the newly installed surface treatment and lighter weight vehicle makes this service possible. **\*To reach the shuttle please call 602-875-0082 from 7:00 AM to 5:00 PM.**

**\*SHUTTLE DISCLAIMER:** There are times when the entire roadway is simply not available for any travel whatsoever for up to two hours and the shuttle will not be able to perform the service until the proper amount of curing has taken place. We appreciate your cooperation as we work to improve your roadways.

**IF WEATHER CAUSES A HALT TO THE PROJECT, YOUR STREET MAY BE REQUIRED TO BE CLOSED ANOTHER DAY.**
